

Black Sand Subplot & Sensor Coordinates

Black sand experiment subplot and sensor locations within 10 x 40 m plots were measure as the x- and y-distance from the upper left corner of plots, looking uphill, with the 10 m plot edge as the x-axis and the 40 m plot edge the y-axis. Coordinates are for the location of the upper left-hand corner of each 1 x 0.5 m subplot and 1 x 1 m ITEX subplot.

subplot coordinates: (1, 1.5)
